

## OBJECTIVE:

\*Containerize a Flask application by using Docker and deploy it to the IBM Cloud Kubernetes Service.

## PREREQUISITES:

- IBM Cloud account
- IBM Cloud CLI
- Docker CLI
- Kubernetes CLI

## STEPS:

1. Start your container using the `docker run` command and specify the name of the image you just created:  
`docker run -dp 3000:3000 getting-started`
2. After a few seconds, open your web browser to <http://localhost:3000>. You should see your app.
